

## 2.16 31636 PREAMPLIFIERS AND MIXERS

1. Microphone Preamplifier Fundamentals
  - 1.1 The Microphone as a Signal Source
  - 1.2 Electrical Model of the Microphone
  - 1.3 Interactions with Preamplifier and Cable
  - 1.4 Some Considerations in Practical Preamplifiers
2. Gain and Headroom
  - 2.1 Input Impedance
  - 2.2 Noise
  - 2.3 Bandwidth and Phase Distortion.
  - 2.4 Common-Mode Rejection, Phantom Power, and RF Immunity
3. Real-World Preamp and Mixer Designs
  - 3.1 Transformers
  - 3.2 Class A Circuitry
  - 3.3 Shure SCM268 Four-Channel Mixer
  - 3.4 Cooper Sound CS 104 Four-Channel ENG Mixer
  - 3.5 Jensen-Hardy Twin-Servo® 990 Microphone Preamplifier
4. Automatic Microphone Mixers
  - 4.1 The Audio Problems Caused by Multiple Open Microphones
  - 4.2 Buildup of Background Noise and Reverberation
  - 4.3 Reduced Gain Before Feedback
  - 4.4 Comb Filtering
  - 4.5 Summary
5. Design Objectives for Automatic Microphone Mixers
  - 5.1 Examples of Design Objectives for an Automatic Microphone Mixer
6. Controls and Features of Automatic Microphone Mixers
  - 6.1 Controls and Features Unique to Automatic Microphone Mixers
  - 6.2 External Control Capability and Status Indication of Automatic Microphone Mixers
  - 6.3 Examples of Communication Protocols Used in Automatic Microphone Mixers
  - 6.4 Number of Open Microphones Attenuation (NOMA)
  - 6.5 Restricting the Number of Open Microphones (NOM)
  - 6.6 Input Channel Attenuation
  - 6.7 Automatic Gain Control
  - 6.8 Types of Automatic Microphone Mixers
  - 6.9 Fixed Threshold Automatic Microphone Mixers
  - 6.10 Variable Threshold Automatic Microphone Mixers
  - 6.11 Gain-Sharing Automatic Microphone Mixers

- 6.12 Direction-Dependent Automatic Microphone Mixers
- 6.13 Noise-Adaptive Threshold Automatic Microphone Mixers
- 6.14 Multivariable-Dependent Automatic Microphone Mixers
- 6.15 Automatic Microphone Mixers with Matrix Mixing to Multiple Outputs
- 6.16 Automatic Mixing Controller
- 6.17 Automatic Microphone Mixers Implemented in Software
- 6.18 Which Type of Automatic Mixer Works Best?
- 6.19 Teleconferencing and Automatic Microphone Mixers
- 6.20 Room and Building Acoustics
- 6.21 Teleconferencing Equipment

## 7. Conference Room Noise

- 7.1 Conference Room Reverberation
- 7.2 Telephone/Transmission System Interface

## 8. Telephone Interface

- 8.1 Microphone Considerations
- 8.2 Microphone Mixing
- 8.3 Loudspeaker Considerations
- 8.4 Send Level Control
- 8.5 Echo Canceler
- 8.6 Historical Examples of Teleconferencing Equipment
- 8.7 The Present and Future of Teleconferencing
